DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to an alternate extrusion system, classified in class 425, subclass 145.
- II. Claims 20-28, drawn to a method of alternate extrusion, classified in class 264, subclass 40.1.
- III. Claims 29-31, drawn to an extrusion die, classified in class 425, subclass 462.

The inventions are distinct, each from the other because of the following reasons:

Inventions of groups II and groups I and/or III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process such as one that forms a composite extrudate or a multicolored product.

Inventions of groups I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination, group I, does not require the constrictions to be upstream of the convergence. The subcombination has separate utility such as forming a composite extrudate or a multicolored product.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to applicant's attorney on 05-MAY-2003 to request an oral election to the above restriction requirement but did not result in an election being made as of 09-MAY-2003, therefore a written restriction has been set forth.

Art Unit: 1732

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
